Sec. 20-3, Storm water, etc., drainage service rate schedules. For and in consideration of the amounts hereinafter set forth in the storm water or wash water drainage service rate schedule, the city will receive into its storm drains, industrial waste lines or sanitary sewers as hereinafter provided, storm waters or wash waters for final disposal by the city.

#### STORM WATERS OR WASH WATER DRAINAGE SERVICE RATE SCHEDULES

##### Schedule "A" Disposal into Storm Drains

1A. The rate for disposal of storm waters or wash waters into the city's storm drains shall be:

	<u>Inside Corporate Limits</u>	<u>Outside Corporate Limits</u>
(a) For the first 1,000,000 gallons or any portion thereof per year	\$30.00	\$43.50
(b) For each additional 100,000 gallons or fraction thereof per year	\$ 2.70	\$ 3.90

2A. The city shall estimate and determine the amount of storm waters or wash waters deposited into the city's storm drains unless the user of the service elects to provide, install and maintain in good working order an integrating meter satisfactory to the city for the purposes of measuring such storm waters or wash waters.

3A. In determining the amount of storm waters, or wash waters deposited into the city's storm drains, no charge shall be made for the storm waters or minor irrigation waters drainage from roofs, pavements or hard-surfaced areas within the city limits. Where such drainage is metered along with wash water, a credit of twelve hundred and fifty gallons per year for each one hundred square feet, as projected and measured upon a horizontal plane, of such drainage

area tributary to the meter shall be allowed. Where roofs or other areas are sprinkled or flushed, such flushing or sprinkling waters shall be included in the quantities for billing purposes. For areas outside the corporate limits of the city tributary to the city's storm drains, storm waters shall be included in the quantities determined for billing purposes and unless otherwise metered, the annual quantity of storm waters shall be assumed as equal to twelve hundred and fifty gallons per one hundred square feet, as projected and measured upon a horizontal plane of roof, pavement or hard-surfaced area serviced.

Schedule "B" Disposal into Industrial Waste Lines

1B. The rate ~~for~~ disposal of storm waters or wash waters deposited into the city's industrial waste lines shall be determined by either the 2B Rate table or the 4B Minimum service charges, hereinafter set forth, whichever is the greater.

2B. Rate table	<u>Inside Corporate Limits</u>	<u>Outside Corporate Limits</u>
(a) <del>For</del> the first 1,000,000 gallons or any portion thereof per year	\$90.00	\$130.50
(b) For each additional 10,000 gallons or fraction thereof per year	\$ 0.81	\$ 1.20

3B. The quantity of storm waters or wash waters used for billing purposes whether or not such service is rendered to properties inside or outside the incorporated limits of the city.

4B. Minimum service charges

	<u>Minimum charge per year</u>	
	<u>Inside Corporate Limits</u>	<u>Outside Corporate Limits</u>
(a) Maximum rate of deposit into industrial waste lines:		
(i) Up to 10 g. p. m.	\$90.00	\$130. 50
(ii) For each g. p. m. in excess of 10 up to 100 g. p. m., add	\$ 9.00	\$ 13.50
(iii) For each g. p. m. in excess of 100 up to 1,000 g. p. m., add	\$ 8.25'	\$ 12.00
(iv) For each g. p. m. in excess of 1,000 g. p. m., add	\$ 7.50	\$ 7.50

(b) For determination of the maximum rate of deposit, all storm waters falling on impervious areas draining directly without retention into the city system shall be computed at the rate of one g. p. m. for each one hundred sq. ft. of area as projected and measured upon a horizontal plane.

(c) For determination of the maximum rate of deposit of other waters than storm waters, the maximum rate shall be the maximum measured or estimated total quantity of water expressed in U. S. gallons discharged in any five consecutive minutes during the billing period divided by five, or the gallons per minute of waste removal service requested by the customer, whichever is the larger.

Schedule "C" Disposal into Sanitary Sewers

1C. The rate for disposal of storm waters or wash waters deposited into the city's sanitary sewers shall be determined by either the 2C Rate Table or paragraph 4B of Schedule "B" next preceding, whichever is the greater.

2C. Rate Table	<u>Inside Corporate Limits</u>	<u>Outside Corporate Limits</u>
(a) For the first 750,000 gallons or any portion thereof per year	\$90.00	\$130.50
(b) For each additional 10,000 gallons or fraction thereof per year	\$ 1.08	\$ 1.56

3C. The quantity of storm waters or wash waters used for billing purposes shall be determined as set forth in paragraph 3B of Schedule "B", next preceding

4C. The City shall have the right at any time for reasons which appear good to it, to discontinue to receive any storm waters or wash waters into its sanitary sewers, from any source either temporarily or permanently, without notice, and parties who may be adversely affected by such discontinuance of such service shall not be entitled to any redress, for damages which may result from the discontinuance of such service by the City without notice.

5C. Before any new drains which will contain storm water or wash water are connected into the city's sanitary sewers or any pipe lines tributary thereto, or before any storm water or wash water service rendered through the sanitary sewers and discontinued by the city is re-established, the party desiring such service shall obtain a written permit from the city council, which permit shall state the maximum quantity and maximum rate of deposit of such storm waters or wash waters and the terms, times, and conditions under which the city will receive such storm waters or wash waters into its sanitary sewers. Any party violating the terms or conditions of such permit shall be liable for all costs and all damages suffered by the city resulting from such violations and to the cancellation of such permit and the termination of any or all service rendered thereunder.

Sec. 20-4. Liquid industrial waste removal service rate schedules. For and in consideration of the amounts hereinafter set forth in the liquid industrial waste removal service rate schedules, the city will receive industrial wastes into its industrial waste disposal lines or into its sanitary sewers for final disposal by the city.

**LIQUID INDUSTRIAL WASTE REMOVAL SERVICE RATE SCHEDULES**

Schedule "A" Disposal into Industrial Waste Lines

1A. The charge for industrial waste disposal service through the city's industrial waste lines shall be based upon either the 2A Rate Table or the 3A Minimum service charges, hereinafter set forth, whichever is the larger.

(a) Offal, or any of the contents of the alimentary canal of any fish, fowl or animals; or,

(b) Any appreciable quantity of fat, blood, urine; or

(c) Any flesh, guts, bone or solid matter which can be removed by screens herein specified under section 20-1 for industrial wastes.

(iv) Any wastes similar to the above resulting from industrial processes and which are not excluded by the provisions of paragraph (iii) next above and which have a normal B. O. D. of not exceeding 1,000 p. p. m.

and average normal S.S., of not to exceed 1,000 p. p. m.

For each 1,000 gallons or fraction thereof  
of Group II liquid waste having a twenty-four  
hour average S.S. of not more than 1,000 .  
p. p. m., the rate shall be \$0.24 \$0.36

For each 100 lbs. of B O D. , or fraction  
thereof, in excess of 1,000 p.p.m. during  
any billing period \$2.25 \$3.30

For each 100 lbs. of S.S. , or fraction  
thereof, in excess of 1,000 p.p.m. during  
any billing period \$0.75 \$1.08

Group III shall include liquid wastes resulting from the following:

(i) Commercial or self-service laundries or cleaning establish-  
ments.

(ii) Any other industrial wastes having a B.O.D. of not to exceed  
500 p. p.m. and a S.S. not to exceed 500 p.p.m. , except those  
wastes resulting from the processing of fruit, berries, nuts, grapes  
or vegetables, milk, cereal or from the keeping, treating, slaughtering  
or dressing of fish, fowl or animals.

For each 1,000 gallons or fraction thereof  
of Group III liquid waste having a twenty-four  
hour average B.O.D. of not more than 500  
p. p. m. and a twenty-four hour average S.S.  
of not more than 500 p. p.m., the rate shall be \$0.75 \$1.08

Group IV shall include liquid wastes resulting from the following:

(i) Washing of automobiles, trucks, etc.

(ii) The flushing of loading areas, pipes, tanks, blowing down of  
boilers, etc.

or flushing or processing of inorganic objects or things having a  
B.O.D. of not to exceed 50 p.p.m. and a S.S. of not to exceed 1,000 p. p. m.

For each 1,000 gallons, or fraction thereof  
of Group IV liquid waste having a twenty-four  
hour average B.O.D. of not more than 50  
p. p. m. and a twenty-four hour average S.S.  
of not more than 1,000 p. p. m., the rate shall be \$0.11 \$0.15

For each 100 lbs. of B.O.D. , or fraction  
thereof, in excess of 500 p.p.m. during  
any billing period \$2.25 \$3.30

For each 100 lbs. of S.S. , or fraction  
thereof, in excess of 500 p.p.m. during  
any billing period' \$0.75 \$1.08

### 3A. Minimum Service Charges

	<u>Minimum Charge Per Year</u>	
	<u>Inside Corporate Limits</u>	<u>Outside Corporate Limits</u>
(a) Maximum rate of deposit into industrial waste lines.		
(i) Up to 30 g.p.m.	\$90.00	\$130.50
(ii) For each g.p.m. in excess of 10, up to 100 g.p.m., add	\$ 9.00	\$ 13.05
(iii) For each g.p.m. in excess of 100, up to 1,000 g.p.m., add	\$ 8.25	\$ 12.00
(iv) For all g.p.m. over 1,000 g.p.m., add	\$ 7.50	\$ 10.80

(b) For determination of the maximum rate of deposit, all storm waters falling on impervious areas draining directly without retention into the city system shall be computed at the rate of one g.p.m. for each one hundred square feet of area as projected and measured upon a horizontal plane,

(c) For determination of the maximum rate of deposit of other waters than storm waters, the maximum rate shall be the maximum measured or estimated total quantity of water expressed in U.S. gallons discharged in any five consecutive minutes during the billing period divided by five, or the gallons per minute of waste removal service requested by the customer, whichever is the larger.

4A. Billing shall be based upon estimates and determinations made by the city of the character and quantity of the wastes. However, if the user of the service is dissatisfied with such determinations made by the city, he may at his sole expense install, maintain and operate in a manner satisfactory to the city such indicating or integrating meters as required to properly measure the flow, or at his sole expense, establish sampling equipment, tests and procedure satisfactory to the city to determine the S.S. or the B.O.D. of the wastes, in which event the billing shall be based on the quantities and the character of the wastes determined by such metering or sampling and testing, insofar as applicable.

### Schedule "B" Disposal into Sanitary Sewers

1B. Industrial waste disposal service through the city's sanitary sewer system will be rendered only in locations where surplus capacity exists in the sanitary sewers, and only within the safe capacity of the city's activated sludge sanitary sewage disposal plant to satisfactorily treat such wastes along with all other wastes then accruing to such plant, at the rates set forth in 3B Rate Table following or 4B Minimum Service Charges, whichever is the greater.

2B. In addition to the industrial wastes which the city will receive into its industrial waste lines, the city will receive into its sanitary sewers limited quantities of such wastes as may result from the keeping, treating, slaughtering, cleaning or dressing of fish, fowl or animals, including minor amounts of offal, contents of alimentary canal, fat, blood or urine; provided, that all flesh, guts, bone or solid matter has been removed therefrom by screens specified under section 20-1 for industrial wastes.
